

Dear Team Members,

Sodalis Senior Living is working to implement the latest guidance from the U.S. Centers for Disease Control and Prevention (CDC) and the Texas Department of State Health Services (TDSHS) relating to COVID-19. At this time, our focus is on prevention, education, and symptom surveillance.

Here are some of the important things Sodalis is doing to help prevent the spread of COVID-19, the flu and other viruses among our residents.

Team Members will be asked to stay home if they are experiencing flu-like symptoms whenever possible.

- Team Members will be reminded when clocking in for their shift to not clock in if they have any symptoms and if so, they will be assessed before they begin caring for residents.
- Each community is cleaned regularly, and increased frequency of cleaning has been implemented in high-touch areas where germs are most likely to be located.
- Hand sanitizer is available throughout every community, please use it and assist residents and family members in our communities to do the same.
- We are asking all visitors and residents to limit their physical contact such as hugging, handshakes, etc. with residents and our Team Members.

To assist us in keeping our residents healthy we ask your help and cooperation in the following simple and effective measures:

- If you or anyone in your family is not feeling well, experiencing cough, congestion, sore throat, shortness of breath or fever **stay at home**.
- If you arrive to your shift and are unsure if you are experiencing symptoms, check in with the nurse for a temperature check.
- If you have traveled outside of the United States in the last 7 to 14 days, please inform us before returning to work.
- If you or one of your family members appear to be symptomatic with one or more of the above symptoms, please remain at home for the safety of the residents until you are symptom free for at least 48 hours.
- Upon arrival to the community, please utilize the alcohol-based hand sanitizers located at the entrance, in the resident rooms, dining areas, and common areas to help prevent the spread of illness.
- If you do begin to experience the need to cough, utilize good cough etiquette.

Thank you for taking precautionary measures to maintain the health of the residents within our communities. We will continue to monitor and implement any applicable guidelines issued by the CDC or TSDHS to reduce the risk of the spread of viruses within Sodalis communities.

Sincerely,
Traci Taylor
President
Sodalis Senior Living
